# Athmi.K

## PROFILE

Aspiring Data Analyst with hands-on experience in data wrangling, exploratory data analysis, and dashboard creation using tools like Python (Pandas, NumPy), SQL, Excel. Recently completed academic projects focused on real-world data analysis and business intelligence.

## PROJECT

### Cake Delight

- Cake Delight is a visually appealing and fully responsive e-commerce website built using HTML, CSS, and JavaScript.
- The platform showcases a variety of cakes with beautiful layouts, smooth interactions, and user-friendly navigation.

### Student Portal System

- The Student Portal System is a backend-driven academic management tool designed using Python and SQL.
- The system mimics real-world institutional databases, giving hands-on experience with relational data modeling and CRUD operations.

### Global Digital Bank

- Global Digital Bank is a Python-powered command-line application that simulates the essential operations of an international banking system.
- Designed to mimic the functionality of real-world banking software
